GOYA CERAMICA

COLECCIÓN 2022

NUESTRA EMPRESA

En el equipo de GOYA CERAMICA trabajamos cada día con el objetivo de ofrecerles lo mejor de nuestras ideas, haciendo que cada modelo que creamos sea una inspiración de ambientes para sus proyectos. Sin olvidar la línea tradicional que nos caracteriza, nuestro producto ofrece una gran variedad de estilos, formatos y acabados pensados para satisfacer las necesidades de cada uno de nuestros clientes.

Con ello pretendemos empezar una nueva etapa con el entusiasmo y la ilusión de ofrecerles un producto que les sorprenda.

EN

At GOYA CERAMICA'S team our main aim is to work every day to offer you the best of our ideas. Each model has been created to be a source of inspiration for your projects. Without leaving aside the traditional line that characterizes us, our products offer a wide variety of styles, sizes and finishes designed to satisfy the requirements of each of our clients.
With all these premises we pretend to start a new period with enthusiasm to offer you a product that could surprise you.

RU

**Коллектив GOYA CERAMICA ежедневно работает над тем, чтобы предложить Вам лучшие идеи, создавая модел и интерьеры, которые станут вдохновением для каждой композиции Ваших проектов. Не забывая о классической
линии, которая характеризует компанию, наша продукция отличается большим выбором стилей, форматов и отделки, удовлетворяя потребности наших клиентов. С помощью этого каталога мы начинаем новый этап, с радостью предлагая Вам продукт, который Вас приятно удивит**

FR

Dans l'equipe de Goya Ceramic, nous travaillons chaque jour avec l'objectif de vous offrir nos meilleures idées, en faisant que chaque modèle que nous créons soit une inspiration ambiante pour vos projets. Sans oublier la ligne traditionnelle qui nous caractérise, nos produits offrent une grande variété de styles, format et définition pensées pour satisfaire les nécessites de chacun de nos clients.

Avec cela, nous prétendons commencer une nouvelle étape avec enthousiasme et illusion pour vous offrir un produit qui vous surprenne.

AR

في فريق قويا سيراميكا ، نعمل كل يوم بهدف تقديم إلهام لخلق أفضل أفكار لمشاريعكم .لذلك لاننسى الخط التقليدي الذي يميزنا ، منتجاتنا تقدم لكم مجموعة متنوعة من الأحجام والتشطيبات المصممة لتلبية إحتياجات كل عملائنا
نحن عازمون على بدء مرحلة جديدة من الخيال في عالم التصميم

CLEANING AND MAITENANCE

Cleaning and maintenance installation

- After the installation, remove the remains of waste seals and the work dirt.
- Do not clean material once it's placed with a putty knife or abrasive pads. Clean the remains of glue and equipment together with a wet sponge, natural one preferably. For this we should use a detergent with a slightly acid action but that do not induce environmental oxidations, respecting the integrity of the joints and material.
- Soak the surface with clean water before to any chemical treatment, to prevent the absorption of the material used on sealing and immediately flush with water to remove the remains of chemical agents. Perform the cleaning of the sealing material when it gets hard, but not too long to be able to clean it.
- It is possible to perform the cleaning mechanically with special machines like rotary brush or plastic fence (no metal). The same way is possible to perform clean manually through the brush with hot water.
- The clean with pressurized water makes the elimination of hard remains easier.
- Before removing a stain with aggressive agents, it is advisable to check their effect on the surface and sealing material in a tile, excess tile or in an area bounded no visible to prevent degradation or significant changes in the surface of the tile.
- If stain persists, clean with alcohol to rubb with a damp cloth.

Cleaning and routine maintenance

- Avoid foreign agents abrasives, recommended place mats in the entry of space.
- In case of spots in the tile is recommended to clean with rush to eliminate them.
- Do not use concentrated chemicals even if pavement bases are acid resistant.
- After any system cleaning rinse with water and air the space.
- In case of any doubt about what type of cleaner used, for safety, test tile on a bit or in a place with few visibility.
- Make sure to use clean water. Making dirty of used water in previous cleaning may cause the dirt to stay after the evaporation of water.
- For cleaning products with high anti-slip properties, it is recommended to use cleaning machinery and / or high pressure water equipment.
- Avoid using detergent that leaves a surface layer of wax. This may reduce the anti-slip pavement. For correct maintenance pavement it is advised to use a neutral detergent type. In cases of organic dirt intense and accumulated in time, we recommend using a type alkaline degreaser cleaner occasionally.
